

Our homes are your home and we want to welcome visitors.

We have closed our home because of Coronavirus.

Visits can still take place but we need to think about how they can be safe.

Before the visit we will complete a Risk Assessment which is a plan, which looks at the best way to keep everyone safe (check what might be a danger and how we can avoid that)

We need to think of ways that visits can work:

Through a window

In the garden

In the car park

In a room (with the window open and lots of room to stay 2 meters apart)

If you have any **complaints or concerns** please let someone know

If we are worried that the visit is not safe we can raise a **Safeguarding** concern or **call the police**
